SPECIALIST APPLICATIONS

Far Simpler... Far Better...

ABOUT

FARÉCLA

Farécla Products Ltd is a UK, family-owned company, manufacturing surface finishing products which are used on a wide variety of substrates.

From compounds and applicators, to paint cups and microfibre cloths, Farécla has provided surface finishing solutions to automotive bodyshops, valeters, boat builders, wood workers, composite manufacturers and other industrial applications since 1952, now in over 120 countries.

QUALITY ASSURANCE

Our scientists use only the best quality raw materials. Our proprietary formulations are manufactured under tight control to deliver reliability and consistency from the first drop to the last.

LABOUR SAVING

The bespoke Engineered Abrasive Technology we use in our formulations achieves a faster cut rate which delivers a final finish requiring less time and fewer steps.

COST SAVING

Our technology achieves a better result than competitors whilst using less product, improving productivity to deliver greater value to our customers.

PERMANENT RESULTS

Our products deliver a superior and permanent high gloss finish avoiding the risk of drop back and the need for reworks.

PROFILE COMPOUNDS AND WAXES

FAR SUPERIOR TECHNOLOGY

Designed by our scientists to provide fast, permanent solutions for surface finishing, Farécla's compounds contain diminishing abrasives that do 2 jobs in 1:

PHASE 1 - Abrasive particles mechanically cut away the scratch marks left after sanding. Throughout this phase, they steadily diminish in aggression.

PHASE 2 - Diminished abrasives polish the surface to a deep gloss finish. (See FIG. 2).

The unique abrasive technology in Farécla products have been tailor made for Farécla in order to optimise the fine balance between cut and polish, achieving a superb, permanent finish in rapid time.

FIG. 1 - Unique Farécla abrasive powder

FIG. 2 - A Farécla abrasive particle diminishing graph

G MOP APPLICATORS

FAR MORE ADVANCED TECHNOLOGY

The material and design of applicator pads are essential to the performance of compounds and the results achieved on surfaces. Farécla G Mop Applicators have been engineered and tested in line with our abrasive products to deliver the best possible performance for surface rectification.

OPEN CELL STRUCTURE - For dry use products, allowing air to flow through, helping to limit the surface overheating during polishing, and provide more aggression!

CLOSED CELL STRUCTURE - For wet use products, where water can be used to help lubrication and limit overheating. The G Mop Yellow Compounding Foams can be used with or without water. (See FIG. 1).

FLEXIBLE AND THIN PADS AND BACK PLATES - For riding swages and compounding evenly over the surface, especially in difficult to reach areas. (See FIG. 2).

FIG. 2 - A G Mop High Cut Foam (**GMC818**) and G Mop Flexible Back Plate (**GMB814**) compounding the difficult areas of swages.

FIG. 1 - 55x magnification of the closed cell structure of a G Mop Yellow Compounding Foam (**GMC612**).

PROFILE COMPOUNDS & WAXES

NOTES

PERMANENT RESULTS

Farécla's Stage 1: **CUT** and Stage 2: **FINISH** compounds are water-based and use diminishing abrasives, instead of fillers, to permanently remove scratches and provide a flawless finish quickly.

PROFILE EXTRA

COARSE CUT COMPOUND

- Rapid, permanent removal of deep scratch marks from P600 or finer
- Use on hard surfaces such as composites, moulds or old gel coats
- Leaves a low level shine, making it suitable for use on stone and granite effect items or in the first of a two step process
- Water-based with low VOC content

Stage 1:
CUT

Sizes

3.2kg

COARSE CUT

PERMANENT - NO FILLERS - NO REWORKS

Finish sanding up to
P600 or finer

Attach a G Mop Twisted
Wool Pad to a polisher
GMW801
(single sided)
GMW806
(double sided)

Spur new pads.
Prime new pads
with product.
Apply a small amount
of product to the
surface or pad.

Spread the product
evenly on the surface
and compound at
1500 - 1800rpm

Wipe away residue
with a clean, dry G Plus
Finishing Cloth
FC-3 (3 x cloths)
FC-100 (100 x cloths)

LET THE MACHINE DO THE WORK

PROFILE SELECT LIQUID COMPOUND

- Excellent on tooling and production gel coats and solid surfaces including artificial marble, Corian etc.
- Removes P800 or finer sanding marks permanently
- Optimal performance when run at **HIGH SPEED (2000 to 3500rpm)**
- Super-fast cut on gel coats (using a G Mop Twisted Wool Pad)

Stage 1:
CUT

Sizes	Codes	Qty
1 ltr	PRS101	6
1 US gallon	PRS106	2
5 US gallons	PRS506	1

EASY TO USE, MINIMAL COMPOUNDING PRESSURE NEEDED

RUN AT HIGH SPEED FOR BEST RESULTS

PERMANENT - NO FILLERS - NO REWORKS

Finish sanding up to P800 or finer

Attach a G Mop Twisted Wool Pad* to a polisher
GMW801
(single sided)
GMW806
(double sided)

Spur new pads. Prime new pads with product. Apply a small amount of product to the surface or pad.

Using minimal pressure, compound at 2000 - 3500rpm

Wipe away residue with a clean, dry G Plus Finishing Cloth
FC-3 (3 x cloths)
FC-100 (100 x cloths)

*Can also use a G Mop High Cut Foam **GMC818**, especially on Corian and artificial marble.

PROFILE ADVANCED LIQUID COMPOUND

- Ideal for high volume polishing of clearcoats, direct gloss and PU lacquers
- Removes P1500 or finer from all modern paint systems
- A long lasting, powerful cutting action
- No fillers, no silicones, no die-back, no reworks
- Clean in use, no dusting or splatter. Exceptionally easy and quick to wipe off

Stage 1:
CUT

Stage 2:
FINISH

Sizes	Codes	Qty
1 US gallon	PRA106	2

FOR ALL PAINT TYPES

POWERFUL CUT

FAST RESULTS

Finish sanding up to P1500 or finer

Attach a G Mop Twisted Wool Pad* to a polisher
GMW801
(single sided)
GMW806
(double sided)

Spur new pads. Prime new pads with product. Apply a small amount of product to the surface or pad.

Compound at 1500 - 1800rpm

Wipe away residue with a clean, dry G Plus Finishing Cloth
FC-3 (3 x cloths)
FC-100 (100 x cloths)

*Can also use a G Mop High Cut Foam **GMC818**, for a lower cut and better gloss.

**PROFILE PREMIUM
LIQUID COMPOUND**

- High quality abrasive, stays wet for a long time
- Engineered for production gel coats and weathered gel coats
- Superb value - quicker application and **much less product required** versus leading brands
- No clogging, extended wool pad life, and clean in use

Sizes	Codes	Qty
1 ltr	PRL101	6
1 US gallon	PRL106	2

- GREAT ON DARK COLOURS
- RESTORES OXIDISED GEL COATS
- NO HAZE, NO DIE-BACK

Finish sanding up to P1200 or finer

Attach a G Mop Twisted Wool Pad* to a polisher
GMW801
(single sided)
GMW806
(double sided)

Spur new pads. Prime new pads with product. Apply a small amount of product to the surface or pad.

Compound at 1500 - 1800rpm

Wipe away residue with a clean, dry G Plus Finishing Cloth
FC-3 (3 x cloths)
FC-100 (100 x cloths)

*Can also use a G Mop High Cut Foam **GMC818**, for lower cut and better gloss.

**PROFILE VECTOR
LIQUID COMPOUND**

- Water-based, cutting compound
- Removes P1500 or finer sanding marks from acrylics, polyester coatings and gel coats
- For dry use only
- Good lubrication prevents excessive friction

Sizes	Codes	Qty
1 ltr	PRV101	6

- SAFE - SILICONE-FREE - ECONOMY PRODUCT
- CLEAN IN USE
- PERMANENT - NO FILLERS - NO REWORKS

Finish sanding up to P1500 or finer

Attach a G Mop Twisted Wool Pad to a polisher
GMW801
(single sided)
GMW806
(double sided)

Spur new pads. Prime new pads with product. Apply a small amount of product to the surface or pad.

Spread the product on the surface and compound at 1500 - 1800rpm

Wipe away residue with a clean, dry G Plus Finishing Cloth
FC-3 (3 x cloths)
FC-100 (100 x cloths)

PROFILE FINISH LIQUID COMPOUND

- Fine compound designed to remove light swirl marks and holograms from high quality painted, lacquered and gel coat surfaces
- Restores dull surfaces and enhances colour
- Gives a high shine finish with good depth and clarity
- For a higher cut, use with a G Mop Lambs Wool Pad

Sizes	Codes	Qty
1 ltr	PRF101	6
1 US gallon	PRF106	2

REMOVES SWIRLS MARKS AND HOLOGRAMS

COLOUR RESTORER

SMOOTH, HIGH SHINE FINISH

Attach a G Mop Finishing Foam* to a polisher **GMF801** (8" / 200mm)

Prime new pads with product. Apply a small amount of product to the surface or pad.

Compound slowly at 1000rpm

Slowly increase speed to 2000rpm. **DO NOT ALLOW TO DRY!**

Wipe away residue with a clean, dry G Plus Finishing Cloth **FC-3** (3 x cloths) **FC-100** (100 x cloths)

*For a higher cut, use a G Mop Lambs Wool Pad **GML801**.

NOW WITH UV INHIBITORS

PROFILE POLYMER UV WAX LIQUID PROTECTION

- Designed to be applied by machine
- Delivers an even, high gloss finish with excellent clarity
- Quick on large surfaces such as on boats, caravans, trucks and planes
- Highly water resistant, providing a durable, protective coating
- Protects against UV rays
- Can also be applied by hand

Sizes	Codes	Qty
1 ltr	PRW101	6

EASY TO APPLY AND REMOVE BY MACHINE

RAPID RESULTS ON LARGE SURFACES

SPRAYABLE

Attach a G Mop Finishing Foam* to a polisher **GMF801** (8" / 200mm)

Prime new pads with product. Apply a small amount of product to the surface or pad.

Spread product on the surface and polish at 1000 - 1500rpm

Allow to dry to a haze

Wipe with a clean, dry G Plus Finishing Cloth **FC-3** (3 x cloths) **FC-100** (100 x cloths)

*To add some cut, use a G Mop Lambs Wool Pad **GML801**.

PROFILE UV WAX LIQUID PROTECTION

- Designed to be applied by hand
- Carnauba based wax incorporating special UV inhibitors, protects gel coats and paints exposed to external weathering for up to 3 months
- Gives an excellent high gloss finish to surfaces
- Does not dry out in use in direct sunlight so it can be applied outside
- Long-lasting protection

Sizes

HIGH GLOSS FINISH BY HAND

HARD-WEARING PROTECTION

WEATHERPROOF

Apply a small amount to a G Plus Finishing Cloth*

FC-3 (3 x cloths)
FC-100 (100 x cloths)

Rub on the surface in circular motions

Allow to dry to a haze

Wipe with a clean, dry G Plus Finishing Cloth
FC-3 (3 x cloths)
FC-100 (100 x cloths)

*Can be applied by machine using a G Mop Finishing Foam **GMF801** at low speed (700 - 900rpm).

PROFILE RAPID DETAILER CLEANER & WAX

- Fast liquid spray application for a quick clean and that 'just waxed' look
- Removes surface contaminants including compound residue, light dirt, dust and fingerprints
- A perfect complement to Profile Polymer Wax or Profile UV Wax Liquid Protection when used in combination, aiding protection
- Suitable for many surfaces including paintwork, rubber, vinyl, plastic, glass and chrome

G MOP APPLICATORS G PLUS ANCILLARIES

TIP

APPLICATOR MAINTENANCE

Clean applicator pads thoroughly before use to avoid contamination and prevent dried product causing damage to your surface.

G MOP TWISTED WOOL COMPOUNDING PAD

- Twisted wool for a high cut
- 100% pure, 4 ply, twisted wool

GMW801 (single sided)
GMW806 (double sided)

G MOP HIGH CUT FOAM

- High cut and rapid, superb gloss
- Superb handling and flexibility, glides easily over surface contours
- Open cell structure for 'dry use' compounds
- Excellent durability

GMC618 (6" / 150mm)
GMC818 (8" / 200mm)

G MOP YELLOW COMPOUNDING FOAM

- Excellent cut and gloss
- Can be used with 'wet or dry use' compounds

GMC312 (3" / 75mm)
GMC612 (6" / 150mm)
GMC812 (8" / 200mm)

G MOP WET USE COMPOUNDING FOAM

- Closed cell structure for 'wet use' compounds
- Higher gloss alternative to Twisted Wool Pad for Profile Extra
- Excellent value

GMC606 (6" / 150mm)

G MOP LAMBS WOOL

PAD

- Medium cut
- Finer finish than Twisted Wool Pads

G MOP FINISHING

FOAM

- Soft, open cell structure
- Light cut
- High gloss finish

G MOP FLEXIBLE

BACK PLATE

- Flexible for easy use on difficult areas
- Ideal for the G Mop High Cut and Lambs Wool Pads

G MOP BOLT ADAPTOR

FOR DOUBLE SIDED PADS

- Screw on and off design
- For use with double sided pads

GML301 (3" / 75mm)

GML601 (6" / 150mm)

GML801 (8" / 200mm)

For 6" pads **GMB586** (5/8" thread)

For 6" pads **GMB166** (16mm thread)

For 8" pads **GMB814** (14mm thread)

For 8" pads **GMB858** (5/8" thread)

For 8" pads **GMB816** (16mm thread)

GMA014 (14mm thread)

GMA058 (5/8" thread)

GMA016 (16mm thread)

G PLUS FINISHING CLOTH

EDGELESS MICROFIBRE

- Low-lint
- Microfibre cloth
- Can be washed up to 100 times

FC-3 (3 x cloths)

FC-100 (100 x cloths)

G PLUS SPURRING BRUSH

FOR PAD CLEANING

- For quick and easy cleaning of pads when spun on a machine
- Avoids residue, dried compound and other contaminants impairing your next job
- Unclogs foam cells to ensure no drop in cut or gloss

1090005 (for all pads)

G PLUS WATER

SPRAY BOTTLE

- Gives an even dispersal of water
- Ensures a supply of clean water, minimises contamination

WSB (600ml)

G PLUS AUTOPEN

FOR JOB IDENTIFICATION

- Non-staining (bodywork and glass) pen
- Does not wash off in the rain, but does wipe off with a clean, damp cloth

AP-5YW (yellow - 5mm nib)

MARINE SURFACE PROCESSES

MOULD PRODUCTION & REPAIR

TOOLING GEL COAT

THE RESULT

Flawless, smooth, defect-free surface on standard or hard tooling gel coat, to limit the reworks needed on finished pieces.
