

Profile Premium

Coarse Cut Paste Compound

Product Description

Premium Paste Compound is a medium aggressive, water-based cutting compound capable of removing up to P800 sanding marks as well as delivering a high gloss finish. With added lubrication, it is also resistant to drying out in hot conditions and on large surfaces. Often used as the sole compound on white gel coats, it can be applied in the first stage of a two part compounding process where higher gloss and lower swirl is required.

Product Information

Size	Code	Ctn Qty
3.5kg (123oz)	PRP301	4

Key Benefits

• Versatile	Engineered for both gel coats and painted finishes, removing up to P800 sanding marks and leaving a high gloss finish
• High Quality Abrasive	No haze, no die back
• Water-Based	Cleans up easily and extends pad life
